subjects

Abdomen
pain and diarrhea after running. Apr. p 13
torso injuries in athletes. Mar. p 87
Achilles tendon: see Tendinitis, Tendons
Acupressure
to relieve menstrual cramps. Mar. p 171
Acupuncture
hepatitis B in a football player after acupuncture treatment. Sep. p 61
Adolescents: see also Children in sports
avulsion fractures of the pelvis. Nov. p 24
cheerleaders require training, conditioning to prevent injuries. Feb. p 140
emotional state affected injury rate in high school football players. Oct. p 8
football injuries in high school, on-field physician assessment. Sep. p 68
football players report high incidence of concussion symptoms. May. p 21
high school sports injuries in boys and girls. Aug. p 46
horseshoe kidney in a high school football player. Mar. p 13
injuries in high school sports, reported by athletic trainers. Feb. p 115
injuries to young athletes. AAP position statement. Feb. p 107
overgrowth syndrome. Sep. p 177
physical education classes result in minor injuries. May. p 17
student trainers useful in high school programs. Apr. p 23
tobacco (smokeless): young male athletes vulnerable to advertising lure. Mar. p 21
track-and-field injuries different in boys and girls. Mar. p 42
weight loss caused by sports/academic pressures may be serious. May. p 17
wrestling injuries more severe than those in other sports. Apr. p 44
Aerobic exercise: see Exercise
Aging: see also Older athletes
bone mineral content high in senior tennis players' dominant arms. Aug. p 43
exercise and calcium/vitamin supplements slowed bone loss in elderly women. Sep. p 8
exercise program increased fitness, decreased fear of pain in claudication patients. Jan. p 34
hip replacement increased exercise levels. Jun. p 168
physiological characteristics of female masters swimmers. Dec. p 75
running not contraindicated for older women. Dec. p 17
Alcohol: see Drugs
Allergy: see also Asthma
effect of high-altitude climbing. Apr. p 13
Altitude
allergies and high altitudes. Apr. p 13
diuretics not recommended. Aug. p 13
hazards of cross-country skiing for cardiac patients. Feb. p 64
training device simulates altitude. Dec. p 30
training improved performance in female runners. Mar. p 22
Amenorrhea: see Menstruation
American Academy of Pediatrics Position Statements
competitive sports for children of elementary school age. Aug. p 140
injuries to young athletes. Feb. p 107
American College of Sports Medicine
guidelines for distance races should be amended, physician says. Feb. p 21
may help USOC test athletes. Nov. p 23
proposes certification standard for fitness instructors. Oct. p 27
American Heart Association
activity guidelines for young people are too conservative. Aug. p 37
Heartland Project teaches children about risk factors. Aug. p 22
Anemia: see Blood diseases
Ankle injuries
DMSO tested on ankle sprains at Temple University. Jan. p 20
fractures from downhill skiing. Jan. p 104
rehabilitation with surgical tubing. Jan. p 143
sprains treated with high voltage galvanic muscle stimulation. Nov. p 137
Anthropometrics: see Body composition
Anti-inflammatory agents: see Drugs
Arm exercise: see Exercise
Arm injuries
range of motion decreased by pitching. Jun. p 21
spiral fractures of the distal humerus from arm wrestling. Apr. p 21
thoracic outlet compression syndrome diagnosed after J. R. Richard's stroke. Feb. p 24
Arm wrestling
and spiral fractures of the distal humerus. Apr. p 21
Arthritis
activity levels for arthritic athletes. May. p 25
hip replacement increased exercise levels in older patients. Jun. p 168
reports show athletes have no higher risk of

continued

osteoarthritis than nonathletes. May. p 43
Arthrography: see Roentgenograms
Arthroscopy
glenoid labrum tears repaired. Sep. p 178
Artificial surfaces
fewer soccer injuries reported on Astro Turf. Feb. p 22
Asthma
exercise-induced in cold weather. Sep. p 131
exercise-induced: severity can be reduced by several factors. Mar. p 50; May. p 58
Astro Turf: see Artificial surfaces
Athletes: see individual sport
Athlete's foot: see Foot, Skin diseases
Athletic care: see also individual sport, individual injury
certification of coaches would fill the void for those without physical education degrees. Mar. p 37
certification of coaches would improve medical care of high school athletes. Feb. p 41
coaching certification dilemma not helped by community apathy. Jun. p 35
the coach's role in the medical care of athletes. May. p 140
emergency information cards should be microfilmed for easy transportation. Aug. p 153
health screening form for high school competition. Aug. p 73
Seattle program provides health care team and training for coaches and students. Nov. p 113
student athletic trainers useful in high school programs. Apr. p 23
Athletic equipment: see Equipment
Athletic performance: see Performance
Auto racing
ground-hugging skirts banned by US Auto Club. Jan. p 21

Back injuries
muscle deficits evaluated with isokinetic device. Jan. p 20
Ballet: see Dance
Baseball: see also Little League, Softball
body fat estimates in major league players. Oct. p 77
major league contracts provide for second opinion for injured players. May. p 21
Doc Medich: a physician on team physicians. Jun. p 135
tobacco (smokeless): physician urges health warning label. Mar. p 21
vision deficiencies (undiagnosed) may hinder performance. Apr. p 21
Baseball injuries
anterior tibial contusions prevented with padding. Apr. p 122
medical problems on a professional team. Jul. p 85
pitching decreased arm range of motion. Jun. p 21
J. R. Richard's pitching arm repaired. Feb. p 24
Bicycling: see also Stationary cycling
touring havens in Europe and the United States. Mar. p 161
Bicycling injuries
in competitive cyclists. May. p 116
ulnar neuropathy. Apr. p 52
Biomechanics
computers change sportsmedicine. Jul. p 118
gait analysis aided by 'Foot Print' pressure pattern machine. Sep. p 26
Bishop, Louis F.
sportsmedicine pioneer. Jan. p 131
Blisters: see individual sport
Blood
doping's physiological basis supported by new studies. Jul. p 59
Blood diseases
hepatitis B in a football player. Sep. p 61
'sports' anemia. Jun. p 73
Body composition: see also Physiological profiles
amenorrhea related to fat loss, not weight loss. Dec. p 105
body fat in ballet dancers below critical level for regular menstrual cycles. Jan. p 33
body fat estimates in major league baseball players. Oct. p 77
body fat guidelines help physicians certify wrestlers in Minnesota, Washington, and Maryland. Nov. p 125
body type significant in runners' iliotibial band syndrome. Oct. p 69
cadaver study challenges body fat formulas. Jul. p 21
circuit weight training effects. Jan. p 44
lean, self-motivated people more likely to keep exercising. Aug. p 43
runners as models of optimal health. Jan. p 64
weight reduction in wrestling: minimum body fat required. Sep. p 78
Body fat: see Body composition
Bone scans: see Roentgenograms
Boxing
safety questioned for preadolescents. Dec. p 27
Brain injury: see also Head injury
neurological results good in cold water near-drowning victim. May. p 17
Bronchospasm: see Asthma

Camps
tennis camp weekends compared. Sep. p 183
Canada
a model for US sportsmedicine? Sep. p 155
Canada Fitness Survey tests fitness of nation. Feb. p 21
sports-related deaths in Alberta (1977). Jun. p 124
survey compares uses of sports sciences in Canada and the United States. Jun. p 153
Cantwell, John D.
personal philosophy reflects interests in preventive medicine and sports. Nov. p 119
Carbohydrate loading: see Nutrition
Carbohydrates: see Nutrition
Cardiopulmonary resuscitation
aquatic CPR could save arrest victims. Sep. p 9
Cardiovascular disease: see Heart disease
Cardiovascular system: see Heart
Car racing: see Auto racing
CAT scans: see Roentgenograms
Cheerleading
sophisticated routines demand safety precautions, conditioning. Feb. p 140
Children in sports: see also Adolescents, Little League
age restriction set by New York City Marathon. Jun. p 22
asthma, exercise-induced: severity may be reduced by several factors. Mar. p 50; May. p 58
behavior disorders improve after running program. Aug. p 23
boxing safety questioned for preadolescents. Dec. p 27
competitive sports for children of elementary school age. Aug. p 140
epilepsy patients' participation should be evaluated individually. Jan. p 34
epiphyseal elbow fractures require careful diagnosis. Jul. p 41
Heartland Project teaches children about risk factors. Aug. p 22
injuries to young athletes, AAP position statement. Feb. p 107
movement stressed by physical educator. Sep. p 147
overuse injuries increasingly common. Nov. p 136
sledding injuries. Feb. p 16
Claudication
exercise program increased fitness, decreased fear of pain in claudication patients. Jan. p 34
Clinics and centers: see also Camps, Olympic Games
Boston's Children's Hospital Medical Center. Oct. p 105
community multisport clubs would provide competitive opportunities. Sep. p 11
coronary risks small at Aerobics Center. Apr. p 32
health clubs, establishing minimum educational standards for employees. Jan. p 134
ISMAT uses musculoskeletal profiling in evaluation and rehabilitation. Apr. p 80
Lenox Hill Hospital's sportsmedicine clinic: survey of patients and injuries. Mar. p 105
Salina Family Physicians clinic employs exercise physiologist for stress tests and rehabilitation. Jul. p 113
sportsmedicine directory 1981. Sep. p 163
Coaching
certification dilemma not helped by community apathy. Jun. p 35
certification would fill the void for coaches without physical education degrees. Mar. p 37
certification would improve medical care of athletes. Feb. p 41
medical care for athletes: what is the coach's role? May. p 140
weight reduction in wrestling: the coach's role. Sep. p 78
Cold
cold water near-drowning victim has good neurological results. May. p 17
effect on diabetes testing devices. Nov. p 17
exercise-induced asthma in cold weather. Sep. p 131
hazards of cross-country skiing for cardiac patients. Feb. p 64
immersion hypothermia victims and ventricular fibrillation. Jan. p 19
thermal injury in cross-country skiers. Dec. p 44
Compartmental syndrome: see Knee injuries
Computers
technology changes sportsmedicine. Jul. p 118
Concussion: see Head injuries
Conditioning: see Exercise, Flexibility, individual sport
Consumer Product Safety Commission

cheerleading injury data. Feb. p 140
Coronary disease: see Heart disease
Cross-country skiing: see Skiing

Dance
ballet dancers' hearts show left ventricular hypertrophy. Apr. p 32
ballet dancers report high incidence of amenorrhea. Jan. p 33
menstrual and diet problems found in Cleveland Ballet. Aug. p 21
Death
Canadian sports and recreation deaths in 1977. Jun. p 124
judo fatalities. Apr. p 61
soccer deaths and prevention. Aug. p 100
sudden death in runners caused by atherosclerosis. Mar. p 32
sudden death in softball players after blow to chest. Jan. p 33
sudden death in young athletes caused by cardiovascular disease. Aug. p 43
Decompression sickness: see Diving injuries
Deep vein thrombosis
in marathon runners. May. p 91

effect of sexual activity on athletic performance, Aug, p 64
Shinsplints: see Running injuries
Shoes: see Equipment
Shoulder injuries
arthroscopic surgery used to repair glenoid labrum tears, Sep, p 178
examining the shoulder girdle, Jun, p 82
rehabilitation with surgical tubing, Jan, p 143
swimmer's shoulder, typical symptoms, Jun, p 168
Skateboarding
fracture survey reveals inexperienced patients, Dec, p 105
Skiing
cross-country, precautions and guidelines for cardiac patients, Feb, p 64
cross-country in Scandinavia, Jan, p 123
physician trains for World Loppet, Feb, p 125
sled-skiing for handicapped athletes in Breckenridge, Dec, p 88
Ski injuries
cross-country injury patterns, Dec, p 44
fractures from downhill skiing, Jan, p 104
hypothermia and frostbite discussed at Nordic skiing conference, Jan, p 19
injuries in Vermont decline, but bindings still set too high, Mar, p 35
poles implicated in thumb sprains of downhill skiers, May, p 24
Skin diseases: see also Herpesvirus
athlete's foot controlled with clean, dry socks, Aug, p 24
Sledding: see Winter sports
Soccer
professional players say clubs provided poor medical care, Nov, p 25
Soccer injuries
deaths in soccer: causes and prevention, Aug, p 100
fewer injuries reported on Astro Turf, Feb, p 22
Sodium pump: see Obesity, Weight reduction
Softball
blow to chest caused sudden death in two players, Jan, p 33
Soviet Union: see Foreign athletes
Spine injuries
CAT scan diagnoses cervical vertebral arch fracture, Jul, p 97
overgrowth syndrome in adolescents, Sep, p 177
Sports clubs: see Clinics and centers
Sports injuries: see also individual sport, anatomical site
in recreational athletes seen at a metropolitan clinic, Mar, p 105
Sportsmedicine
Louis F. Bishop, sportsmedicine pioneer, Jan, p 131
Canada: a model for US sportsmedicine? Sep, p 155
computer technology changes sportsmedicine, Jul, p 118
directory of clinics and centers—1981, Sep, p 163
educational programs growing, Jan, p 145
Great Britain has problems in developing sportsmedicine, Mar, p 23
Fred W. Kasch, sportsmedicine pioneer, Aug, p 125
survey compares use in Canada and the United States, Jun, p 153
Squash: see Racket sports
Stationary cycling
guidelines for at-home exercise, Oct, p 110
Steroids: see also Drugs
anabolic steroids had no effect on muscle fiber size, Jul, p 22
Strength
back and trunk muscles evaluated with isokinetic device, Jan, p 20
circuit weight training: physiological effects, Jan, p 44
development program at University of Nebraska, Aug, p 115
reduced after rapid weight loss in wrestlers, Nov, p 73
resistance exercises for the neck, May, p 165
Strength training: see Weight training
Stress
menstrual changes may be associated with stress, Nov, p 98
tranquilizer effect of exercise, Nov, p 46
Stress testing: see Exercise testing
Stretching exercises: see Flexibility
Sudden death: see Death
Surgery
ossicle in Osgood-Schlatter disease may require surgery for healing, Mar, p 35
vascular surgery repairs J. R. Richard's pitching arm, Feb, p 24

Surveys and polls
Canada Fitness Survey tests fitness of nation, Feb, p 21
Hoffman-LaRoche survey shows Americans know value of exercise, Jul, p 23
survey of US national governing bodies reveals communication gap, Jun, p 153
Swimming
breath-holding training method may cause loss of consciousness, Jul, p 13
caloric cost, Oct, p 19
masters female swimmers: physiological characteristics, Dec, p 75
Swimming injuries
breaststroker's knee caused by improper whip kick, Jul, p 41
swimmer's shoulder, typical symptoms, Jun, p 168
Syncope
after a lacrosse shot to the neck, Aug, p 94

Tae Kwon Do
injuries, Feb, p 97
Taping
for runners' heel pain, Feb, p 139
Tcheng-Tipton: see Wrestling
Team physicians: see Physicians
Teeth: see Dental care
Tendinitis: see also individual sport
Achilles, from running, Jan, p 147
Tendons
Achilles ruptures healed with conservative treatment, Nov, p 134
Achilles ruptures treated with open repair and early motion, Sep, p 177
Tennis
bone mineral content high in senior players' dominant arms, Aug, p 43
HDL-C levels high in frequent players, Jun, p 166
performance correlated to aerobic fitness levels in young female players, Nov, p 23
racket grip size, how to measure correctly, Jun, p 42
tennis camp weekends compared, Sep, p 183
WTA trainer emphasizes prevention, Feb, p 24
Tennis injuries
elbow, conservative treatment program, Jun, p 42
elbow pain relieved with transverse friction massage, Oct, p 116
Testing procedures: see also Exercise testing, Preparticipation physical examinations
anterior cruciate ligament tears diagnosed with history, tests, Aug, p 24
body fat tests help physicians certify wrestlers in Minnesota, Washington, and Maryland, Nov, p 125
Canada Fitness Survey tracks national fitness levels, Feb, p 21
drug testing expensive, perpetuates use, physician says, Feb, p 22
fire fighters' endurance measured with job-related fitness tests, Apr, p 92
isokinetic evaluation for back and trunk injuries, Jan, p 20
shoulder girdle examination, Jun, p 82
Thorax
torso injuries in athletes, Mar, p 87
Thumb injuries: see Finger injuries
Tobacco
smokeless tobacco: young male athletes vulnerable to advertising lure, Mar, p 21
Torso injuries: see Abdomen, Thorax
Toxic shock syndrome
victims exercised less than controls, Jun, p 21
Track and field
effect of training on cardiovascular fitness, Feb, p 48
injury patterns differ in high school boys and girls, Mar, p 42
Trainers
program in Seattle provides health care team and training for coaches and students, Nov, p 113
student trainers useful in high school programs, Apr, p 23
Women's Tennis Association trainer emphasizes prevention, Feb, p 24
Training
altitude training device, Dec, p 30
altitude training improved performance in female runners, Mar, p 22
echocardiography shows left ventricular changes after short-term and prolonged training, May, p 102
range-of-motion exercise: biophysical factors, Dec, p 57
running economy improved with interval training, Apr, p 107
Soviet program superior to that of the United States, researcher says, Nov, p 127
swim training method (breath holding) may cause loss of consciousness, Jul, p 13
Trampolines: see also Rebound exercise
banned for cheerleaders in Big Ten schools, Feb, p 140
Transcutaneous neural stimulation: see Electrical stimulation
Travel
bicycle touring in Europe and the United States, Mar, p 161
fitness program on board the Queen Elizabeth 2, May, p 155
Fort Royal Club Med offers daily sports agenda, Jul, p 129
Hawaii offers variety of sports and recreation opportunities, Nov, p 131
Palm Beach Polo and Country Club, Oct, p 121
ski touring in Scandinavia, Jan, p 123
tennis camps in Long Island and Florida compared, Sep, p 183
Triathlons
special problems for organizers and competitors, Oct, p 132
Twins
studies try to determine how much of athletic ability is inherited, May, p 131

USSR: see Foreign athletes
Urology
hematuria in an athlete with a horseshoe kidney, Mar, p 13
theory and management of exercise-related hematuria, Nov, p 90

Venograms: see Roentgenograms
Viral infections: see Herpesvirus
Vision
baseball players' cross-dominance may result in higher batting average, Apr, p 21
baseball players' deficiencies may hinder performance, Apr, p 21
eye guards for racket sports prevent many injuries, Jan, p 91; Feb, p 79

Water sports: see also Diving, Swimming, Waterskiing
aquatic CPR technique could save cardiac arrest victims, Sep, p 9
deaths in Canada in 1977, Jun, p 124
personal flotation devices for the handicapped, Aug, p 147
waterskiing 'douche' may cause serious injuries, Jun, p 166
Waterskiing
'douche' may cause serious injuries, Jun, p 166
Weight lifting: see also Weight training
static exercise response unchanged after weight lifting program, Sep, p 8
Weight reduction: see also Obesity
caloric cost of swimming, Oct, p 19
effect of rapid weight loss on physiological functions in wrestlers, Nov, p 73
excessive weight loss by adolescent athletes caused by sports/academic pressures, May, p 17
exercise may counteract sodium pump imbalance in obese people, Mar, p 22
weight control program advised to prevent excessive weight loss in adolescent athletes, May, p 17
wrestlers' weights certified with body fat guidelines in Minnesota, Washington, and Maryland, Nov, p 125
in wrestling, Sep, p 78
Weight training
circuit-running program improves fitness, Aug, p 22
and the female athlete, Jun, p 109
masters power weight training, Aug, p 133
physiological benefits reviewed, Jan, p 44
University of Nebraska program is a model for others around the country, Aug, p 115
Wilderness schools
are the risks too great? Mar, p 132
Winter sports: see also individual sport
sledding injuries, Feb, p 16
sled-skiing for the disabled, Dec, p 88
Women: see Female athletes
Wrestling
body fat guidelines help physicians certify wrestlers in Minnesota, Washington, and Maryland, Nov, p 125
effect of rapid weight loss on physiological functions, Nov, p 73
weight reduction in wrestling, Sep, p 78
Wrestling injuries
herpes simplex localized in wrestler's knee joint, Sep, p 9
in high school, Feb, p 115
high school injuries more severe than those in other sports, Apr, p 44
Wrist injuries
radiocarpal joint impingement linked to platform divers' entry technique, Jun, p 23
skateboarding fractures, Dec, p 105
